

The Fifth Silk Road International Exposition and the Investment and Trade Forum for Cooperation between East and West China

Shaanxi Provincial Development and Reform Commission

April , 2021

CONTENTS

Modern Agriculture Sector

1. Construction Project of Agriculture Industrial Supply Chain Base of Yulin City	1
2. Modern Seed Base Project of Yulin City	2
3. Construction Project of Genuine Herbal Medicine Industrial Base of Yulin City	3
4. Yan'an Apples Fine and Deep Processing Project	4
5. Green Ecological Agriculture Circular Base Project of Liquan County	5
6. Milch Goats Breeding and Deep Processing Project of Fuping County	6
7. Wupo Agriculture Ecological Industrial Park Project of Chengcheng County	7
8. Changfeng Yew Edible Fungus Project of Zhen'an County	8
9. Construction Project of Resource Integration of Tea Industry and "Intelligent Storage"	9
10. Lotus and Fish Planting Project of Zhichuan Town, Hancheng City	10
11. Integrated Development Project on Forest Musk Deer Protection and Artificial Breeding Industry of Fengxian County	11

Advanced Manufacturing Sector

12. Automobile Electronic Instruments Production Project of Yongshou County	12
13. High Voltage Isolating Switch and High Voltage Breaker Project of Xianyang Chint Group	13
14. The 2 nd Stage of the Intelligent Brake Project of Xi'an Fast	14
15. MEMS Sensor Manufacturing and Sensor Incubation Industrial Park with Annual Output of 2 Million Pieces a Year	15

16.Robot Production and Application Integration Project of Intelligent Robot Manufacturing Industrial Park of Baoji City	16
17.Automobile Components Industrial Park Project of Xi'an Economic Technologies Development Zone.....	17
18.High-efficient Photovoltaic Components Production Project with Annual Output of 5GW of Xi'an Aerospace Industrial Base	18
19.Construction Project of Aviation Spare Parts Supply Chain Center of Fuping County	19
20.Construction Project of Intelligent Manufacturing Base on Assembly Building in Luyang Lake, Weinan	20
21.Project of Aluminum Alloy Precision Casting for Automobile with Annual Output of 2 Million Pieces in Tongchuan	21
22.Research Development and Manufacturing Project of Medical Electronics and Electric Equipment of Tongchuan.....	22
23.Airplane Maintenance and Refitting Project of Shaanxi Aircraft Industry (Group) Corporation Ltd.....	23
24.Construction Project of Hanzhong General Aeronautics Airplane Production Line.....	24
25.Research Development and Manufacturing of Precision Medical Treatment Equipment and Medicine Translation Center Project.....	25
26.Research and Development and Production Project of 300,000 Pieces/Year Batteries, Motors and Electric Controls System in Baoji City	26
27.Railway Engineering Vehicles Research Development, Achievement Transformation and Its Production Line Project in Baoji City	27
28.Production Base Project of Key Robot Components of Baoji City	28
29.Construction Project of Industrial Robot Controller Production Line with Annual Output of 50,000 Pieces	29

Food and Medicine Sector

30.Edible Fungus Industrial Park Project of Dingbian County	30
31.50,000 t/y Lactic Acid and Polypeptide Products Project in Wuqi County	31
32.Liquan County Meat Products Deep Processing Project.....	32
33.Persimmon Deep Processing and Three-Industry Integration Industry Project of Fuping County.....	33
34.Construction Project of Agricultural Products Deep Processing Base of Guanchi Town, Dali County	34
35.Construction Project of Cosmetics Production Line of Shangzhou District, Shangluo City	35
36.Reagent Kit Development Project of Hancheng City.....	36
37.Deep and Fine Processing Project of Pricklyash Peel of Hancheng City.....	37
38.Construction Project of Plant Extracts of Baoji Listen Pharmaceutical	38
39.Cattle and Goat Milk and Their Byproduct Processing Project in Longxian County	39
40.Nutrition Supplemental and Healthcare Products Production Project of Baoji City	40
41.Formula Goat Milk Powder and Infant Milk Powder with Special Medical Purpose in Longxian County.....	41
42.Royal Jelly Series Healthcare Products Processing Project of Baoji City.....	42
43.Pawpaw Series Products Development Project of Baihe County.....	43

High-Tech Industry Sector

44.10.5/11 Generation TFL-LCD Panel Production Line Project in Xianyang	44
45.Flexible AMOLED Display Screen Project of Xianyang.....	45
46.12-inch Wafer Chip Industry Manufacturing Base Project of Xianyang	46

47.12- Inch Memory Chip Packaging Project of Xianyang High-Tech Industries Development Zone.....	47
48.Stem Cell Preparation Industrial Park Project of Xianyang City	48
49.Semiconductor Sealed Production Base Project of Xixian New Area	49
50.AR/VR Industrial Base Project of Xixian New Area	50
51.Independent and Controllable Chip Production Base Project of Xi'an Aerospace Industrial Base.....	51
52.Research and Development and Manufacturing Project of Business Space Satellite of Xi'an Aerospace Base	52
53.Industrialization Upgrade of 3D Printing Industry Cultivating Base of Weinan High-Tech Industries Development Zone	53
54.Fine Processing Project of Optical Components and Electronics Components of Tongchuan.....	54
55.Aviation New Materials Production Line Project of Tongchuan City	55
56.Taihua Anti-tumor Biological Preparation Project of Luonan County.....	56
57.Shanyang Henghuan Low-Molecular-Weight Heparin Sodium Series Product Project	57
58.Construction Project of High Performance Fiber Reinforced Composite Product in Yangxian	58
59.Passive Components Production and Manufacturing Project of Baoji City	59
60.Carbridge and Electronics Information Industrial Park Project of Baoji City.....	60

Infrastructure Sector

61.Construction Project of Yanchuan County North Shaanxi Agricultural Products Warehousing Center	61
---	----

62.The Children Park Project of Yan'an New District	62
63.Construction Project of Underground Comprehensive Pipeline Corridor of Yongshou County.....	63
64.The Second Stage of the Shantytown Reconstruction Project of the Eight-Immortal Temple.....	64
65.The First Stage of the Shantytown Reconstruction Project of Lintong Railway Station, Xi'an.....	65
66.Comprehensive Reconstruction Project of South Area of Xiguanzheng Street, Xi'an City	66
67.Commercial Complex Project of West Station Street in Xi'an City	67
68.Development Project of the Plot at Northwest Angle of Beida Street Crossing in Xi'an	68
69.Fengling Times City Complex and Outlets Town Project in Baoji City.....	69
70.Smart City Project of Jintai District, Baoji City	70

Energy Saving and Environmental Protection Sector

71.“Energy Storage Valley” Project of Yan'an High-Tech Industries Development Zone	71
72.Liquan County Wind Power Generation Project.....	72
73.Xingping No. 2 Wastewater Treatment Plant Project	73
74.Urban and Rural Domestic Garbage Resource Utilization Project of Liquan County	74
75.Shale Gas Exploration Development Project of Zhenba County	75

Modern Service Industry Sector

76.Agriculture Technology Exchange and Training Demonstration Base Project of Shanghai Cooperation Organization in Yangling	76
--	----

77. Yangling Intelligent Agriculture Valley Project.....	77
78. Construction Project of Yan'an Intelligent Sorting and Cold Chain Logistics System	78
79. Xianyang High-Speed Railway Business Complex Project	79
80. Mobile Internet Animation Industrial Park Project of Xixian New Area.....	80
81. Inspection and Testing Western Industrial Base Project of Fengdong New City in Xixian New Area	81
82. West E-commerce Port Project of Fengdong New City of Xixian New Area	82
83. Fengdong International Copyright Exchange Center Project of Xixian New Area	83
84. Culture Business Complex Project at South Side of Fengqing Road, Xi'an	84
85. Agricultural Products Logistics City Project of Xi'an City.....	85
86. Xi'an Culture CBD Project	86
87. Consumable Industrial Park Project of Xi'an Economic Technologies Development Zone	87
88. Aerospace Commercial Complex Project of Xi'an Aerospace Base.....	88
89. Shangluo International Logistics and Business Trade City Project.....	89
90. Construction Project of Yellow River Gold Delta Bonded Logistics Park Area	90

Culture and Tourism Sector

91. Yangjiagou Red Tourism (Phase I) Project of Mizhi County	91
92. Construction Project of Qingjian Red Culture Creative Industrial Park	92
93. Wubu Stone City Development Project.....	93
94. Suide Stone Carving Culture Creative Industrial Park Project.....	94
95. Construction Project of Wetland Ecological Park along Yellow River in Jiaxian County	95

96.Nanniwan Red Education and Research and Learning Base Project.....	96
97.Qin-Jin Grand Gorge Tourism Sightseeing Belt Project of Yan'an	97
98.Cultural Tourism Park Project of Ganguyi Ancient Town	98
99.The Mass Production Culture Park of Nanniwan, Yan'an City	99
100.Xianyang Film & TV Culture Industrial Base Project	100
101.Development Project of Zhengguo Canal World Irrigation Project Ruins Park of Jingyang County	101
102.Comprehensive Tourism Development Project of Malan Revolutionary Area of Xunyi County	102
103.Construction Project of Zhaoren Temple Scenic Spot of Changwu County	103
104.Hongmen Banquet Han Culture Tourism Area Development Project	104
105.Lantian Apeman Site Park Project.....	105
106.Zijing Mountain Historical and Folk Culture Experiencing Area Project of Baoji City	106
107.Ancient Chencang Heritage Park Project	107

I. Project Name***Construction Project of Agriculture Industrial Supply Chain Base of Yulin City*****II. Project Implementation Agency**

Yulin Investment Promotion Service Center

III. Project Description

The project, having a planned land-using area of 500 mu, is mainly to build five functional areas including a scientific technological agricultural materials supply center, a cold chain warehousing center of special agricultural products, an after-finishing center of special agricultural products, an exchange center of special agricultural products and supply chain finance service center. From the vertical angle, it will make the industrial chain to extend to the front and the back, increasing the fine and deep processing proportion of agricultural products and realize value increasing; from the horizontal angle, it will widen the links of the agricultural production, enlarging industrial links and production functions to make the logistics, information flow and capital flow smooth to decrease the exchange cost and obtain the benefits of the whole chain. The Yuyang District and Hengshan New District own better conditions for the project construction. The Project Proposal has been prepared.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 850 million Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual business income will be RMB 360.9962 million Yuan and annual total profit RMB 109.8684 million Yuan. The investment recovery period is 7.6 years.

Contact Person: Feng Guangbin

Telephone: 0912-3598860

I. Project Name***Modern Seed Base Project of Yulin City*****II. Project Implementation Agency**

Yulin Investment Promotion Service Center

III. Project Description

The project is mainly to build the potato seed base with Suide, Qingjian and Zizhou as main, the miscellaneous grain seed base with Qingjian, Wubu and Mizhi as main, the Chinese herbal medicine, hybrid oil vegetables and advantageous special seed base with Suide, Wubu and Mizhi as main, the vegetable seed base with Qingjian, Zizhou and Wubu as main, the hybrid corn seed production base with the area along the Great Wall, the “Chinese character Ren- shape” industrial belt in Wuding River and the “Chinese Character Yi- shape” industrial belt with better water and fertile conditions in Baiyu Mountainous Area and South Hilly Area as the main, 10000-mu high-quality mountain apple cultivation base. The project proposal has been prepared.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 220 million Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual business income will be RMB 114.5834 million Yuan and annual total profit RMB 31.884 million Yuan. The investment recovery period is 6.9 years.

Contact Person: Feng Guangbin

Telephone: 0912-3598860

I. Project Name***Construction Project of Genuine Herbal Medicine Industrial Base of Yulin City*****II. Project Implementation Agency**

Yulin Investment Promotion Service Center

III. Project Description

Taking Zizhou, Suide, Mizhi, Jiaxian, Qingjian, Jingbian, deep *loessial area* and hilly area and the west mountainous area in South Dingbian as main, it focuses on the development of astragalus, liquorice, seabuckthorn. It is planned to build 10,000 mu of standard astragalus planting demonstration base, 10,000 mu of standard liquorice planting base, 10,000 mu of standard seabuckthorn planting demonstration base. The project, covering an area of 200 mu, is planned to build Yulin Ecological Herbal Medicine Industrial Demonstration Park, a traditional Chinese medicine decoction pieces processing plant, a traditional Chinese medicine healthcare products research development center and Yulin genuine herbal medicine industrial chain in Yuyang District. The project proposal has been prepared.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 180 million Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual business income will be RMB 118.9655 million Yuan and annual total profit RMB 31.0345 million Yuan. The investment recovery period is 5.8 years.

Contact Person: Feng Guangbin

Telephone: 0912-3598860

I. Project Name***Yan'an Apples Fine and Deep Processing Project*****II. Project Implementation Agency**

Yan'an Municipal Investment Promotion Bureau

III. Project Description

In related fruit area of the whole city, four sites are totally built. The specific construction contents: having a covered area of 80 mu, it is planned to build two concentrated apple juice production line with annual output of 15000 tons, which can process 218700 tons of apple; covering an area of 30 mu, it is planned to build the apple essential oil production line with annual output of 100 tons. It is to newly build raw apple pretreatment workshop, essential oil workshop, air-conditioning warehouse, cold finished products warehouse, with total construction area of 9000 m². Having a covered area of 30 mu, it is planned to build the beauty spraying agent production line with annual output of 100 tons, build workshops involving pretreatment, extraction, diacolation, preparation, packaging workshops; having a covered area of 50 mu, it is to build apple branch fertilizer processing line with annual output of 10000 tons, build production workshops, material warehouse.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 2.7 billion Yuan. Cooperation form: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be RMB 3.32 billion Yuan and profit will be RMB 960 million Yuan. Of which, for the concentrated apple juice production line, annual sales income will be RMB 1.55 billion Yuan, annual total profit will be RMB 380 million Yuan and the investment will be recovered within 4 years; for apple essential oil production line, it is estimated that annual sales income will be RMB 1.5 billion Yuan, total profit will be RMB 430 million Yuan and the investment will be recovered within 3 years.; for the beauty spraying agent production line, it is estimated that annual sales income will be RMB 150 million Yuan, annual total profit will be RMB 80 million Yuan, the investment will be recovered within 4 years. For apple branch fertilizer processing, it is estimated that annual sales income will be RMB 120 million Yuan, annual total profit will be RMB 70 million Yuan and the investment will be recovered within 3.6 years.

Postal Code: 716000

E-mail: 931040692@qq.com

I. Project Name***Green Ecological Agriculture Circular Base Project of Liquan County*****II. Project Implementation Agency**

Liquan County Investment Promotion Bureau

III. Project Description

The project is separated into three areas. The first is the planting area, having a covered area of 1200 mu, it focuses on the planting of organic economic crops, basic agricultural crops and seedling cultivation; the second is the breeding area, raising 200,000 green poultries and covering an area of 2100 mu; the third is the processing area, focusing on the pollution-free processing. It takes farm livestock as main and covering a covered area of 33 mu.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 300 million Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it may provide more safety green organic food.

Contact Person: Zhao Ruigang

Telephone: 029-35618802

E-mail: liquanzhaoshang@sina.com

I. Project Name***Milch Goats Breeding and Deep Processing Project of Fuping County*****II. Project Implementation Agency**

Bureau of Agriculture and Rural Affairs of Fuping County

III. Project Description

The project is planned to carry out the construction of standard demonstration farm to support the breeding in scale and upgrade the home meadow, build 10,000 milch goats breeding base, a goat milk nutrition research center to research the high-end goat milk products and actively develop milk healthcare products, milk powder, snacks, face mask, wash supplies and other various products in Fuping County.

IV. Total Investment and Cooperation Form

Total estimated investment of the project is RMB 1.4 billion Yuan. Investment promotion is adopted.

V. Anticipation of Market and Analysis of Investment Return

Relying on the existing milch goats breeding foundation and the flagship enterprises of Red Star Meiling and Shengtang Dairy Products, it is to upgrade the development level of “capital of goat milk”, enlarge the popularity and influential of “Fuping Milch Goats” and “Fuping Goat Milk Powder”.

Contact Person: Li Fang’e

Telephone: 13389133526

I. Project Name***Wupo Agriculture Ecological Industrial Park Project of Chengcheng County*****II. Project Implementation Agency**

The People's Government of Siqian Town, Chengcheng County

III. Project Description

Having a planned area of 50,000 mu in Siqian Town of Chengcheng County, it is planned to build the beef cattle breeding base, mutton sheep breeding base, barred plymouth rock base, forage planting base, one-thousand mu greenhouse and potted plant cherry base and other bases and supporting facilities involving high-efficient water-saving irrigation, air-conditioning warehouse, nursing home, rural folk-custom tourism and sightseeing, professional farmer training and etc.

IV. Total Investment and Cooperation Form

Total estimated investment of the project is RMB 2.76 billion Yuan. Cooperation, joint venture or sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will speed up to promote the supply-side structural reform of agriculture, realizing the rural comprehensive development pattern integrating in modern agriculture, recreational agriculture and rural community.

Contact Person: Qi Jianqiang

Telephone: 13379134567

I. Project Name***Changfeng Yew Edible Fungus Project of Zhen'an County*****II. Project Implementation Agency**

Shaanxi Changfeng Agriculture Technology Development Co., Ltd.

III. Project Description

It is planned to build the project in Nongfeng Village of Xikou Huizu Town of Zhen'an County, which can produce 2 million bags of yew, each bag can hold 0.5 Jin of dry agaric, build seedling sheds. It has a covered area of 27800 m² (about 41.7 mu). The area of the base of the building is 19485 m², the green space area is 4170 m² and the area of road and ground hardening is 4145 m²

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 50 million Yuan, including the engineering cost of RMB 31.7482 million Yuan, other cost for engineering construction RMB 3.3515 million Yuan, land transfer fee RMB 4.17 million Yuan, basic preparation fee RMB 2.7303 million Yuan, circulating fund RMB 8 million Yuan. Cooperation form: joint venture, cooperation or other forms.

V. Anticipation of Market and Analysis of Investment Return

The project cultivates fungi by adding the wood chips of mushroom to the sticks of Chinese yew, to grow the edible fungi, which contains tiny amounts of taxol, an anti-cancer ingredient (contains 0.008 millionths taxol). At present, China's edible fungi industry market is gradually expanding, consuming 12 million tons of edible fungi per year, only the Beijing market sells 150,000 tons a year, so the market prospect is promising, the Chinese yew edible fungi with anti-cancer effect will have a very broad market space. After the project is completed, annual sales income of RMB 40 million Yuan, profit of RMB 13 million Yuan, tax of RMB 3.5 million Yuan will be realized. The ecological, economic and social benefits are considerable.

I. Project Name***Construction Project of Resource Integration of Tea Industry and “Intelligent Storage”*****II. Project Implementation Agency**

Xixiang County Economic Cooperation Service Center
Ningqiang County Economic Cooperation Bureau
Nanzheng District Economic Cooperation Bureau

III. Project Description

The project has a covered area of 200 mu in Xixiang County, Ningqiang County and Nanzheng District. Relying on the tea resources and industrial foundation in Hanzhong and taking building intelligent storage as the guide, the project is planned to build the fine and deep processing base of tea, internet +tea integration demonstration belt, build the complete industrial chain system with the market as the guide, the intelligent storage as the drive, intelligent processing as the support, intelligent planting as the guaranteeing and cultural tourism as the extension. Having a total construction area of 140,000 m², it is planned to mainly build 3 blocks of intelligent storage (with the total treatment capacity of 20,000 tons of tea and its upstream and downstream products), the intelligent production base (with the designed production capacity of 5000 tons of functional extracts and 100,000 pieces of functional products) and the demonstration belt of “internet + tea and tourism integration demonstration belt”(including intelligent tea park, sightseeing experiencing area, tea culture exposition center and tea products exhibition and shopping center).

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 823 million Yuan. Sole investment, joint venture or cooperation is adopted.

V. Anticipation of Market and Analysis of Investment Return

At present, the international and home tea market demand is increasing constantly. In 2020, it is estimated that the tea consumption of our country is about 2.045 million tons. Additionally, with the constant increase of rural leisure sightseeing and tourism market, the project market demand is strong and the market space is huge. It is estimated that annual business income will be about RMB 2.495 billion Yuan and annual total profit about RMB 374 million Yuan. The investment recovery period is 5.41 years (before tax).

I. Project Name***Lotus and Fish Planting Project of Zhichuan Town, Hancheng City*****II. Project Implementation Agency**

The People's Government of Zhichuan Town, Hancheng City

III. Project Description

The project, covering an area of 1000 mu, is located at Xishaoliang Village and Tanzi Village in Zhichuan Town. Over 600 mu of lotus has been built. It focuses on the characteristic agriculture based on crucian, loach, crayfish and water vegetables.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 10 million Yuan. Sole investment or joint venture is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual income will be RMB 30 million Yuan and net profit RMB 20 million Yuan. The investment recovery period is 5 years.

Contact Person: Feng Kai

Telephone: 0913-2252929 18992334555

I. Project Name***Integrated Development Project on Forest Musk Deer Protection and Artificial Breeding Industry of Fengxian County*****II. Project Implementation Agency**

Fengxian County Forestry Bureau

III. Project Description

Fengxian County is “the Hometown of Forest Musk Deer of China”. The project is planned to build a Forest Musk Deer Engineering Research Center, a Disease Treatment Center, 10 Fine Well-bred Forest Musk Deer Centers, one wild transition training base, 50,000 mu of Forest Musk Deer Forge Bases and 12 Derivative Products Processing Enterprises, one standard granule feedstuff processing enterprises, 10 dehydrated forge centers, 3 protection areas, one special forest musk deer town, one forest musk deer exhibition hall, one theme park and the supporting projects of 10 special musk deer healthcare zones. It will fatten 50,000 musk deer, produce 250kg of muskiness, and provide 15000 forest musk deer and 50,000 mu of forest musk deer forage base.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.5 billion Yuan. Joint venture or sole investment is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual production value will be about RMB 250 million Yuan and local tax contribution over RMB 30 million Yuan. It may provide jobs for 200 persons.

I. Project Name***Automobile Electronic Instruments Production Project of Yongshou County*****II. Project Implementation Agency**

Yongshou County Investment Promotion Bureau

III. Project Description

This project will be built by two stages. After the completion of the first stage of the project, it will produce automobile audio, car navigator; after the completion of the second stage of the project, it will produce LED lights, electronic meters, and safety airbags.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 800 million Yuan. Cooperation form: sole investment or cooperation.

V. Anticipation of Market and Analysis of Investment Return

With the economic development of our country, the automobile production scale is increasing at a speed of nearly 30%. In a period in future, the automobile demand of the country is increasing. After the completion of the project, annual production value will be RMB 470 million Yuan and profit RMB 160 million Yuan.

I. Project Name***High Voltage Isolating Switch and High Voltage Breaker
Project of Xianyang Chint Group*****II. Project Implementation Agency**

Chint Group

III. Project Description

The project, covering an area of 200 mu, is located at the south Longi Solar Technology Co., Ltd and the north of Xingye Road. It is mainly to build the High Voltage Isolating Switch and High Voltage Breaker production line, including equipment purchase, production workshop, finished products and raw materials warehouse and supporting facilities.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.5 billion Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, annual sales income will be RMB 200 million Yuan and tax over RMB 20 million Yuan. It can provide jobs for over 300 persons.

Telephone: 029-33229145 13892010000

I. Project Name***The 2nd Stage of the Intelligent Brake Project of Xi'an Fast*****II. Project Implementation Agency**

Shaanxi Fast Group

III. Project Description

The project, located at the south of Wenyi Road and East of Xihua Road, is planned to build the cylinder production line integrating digitization, Intelligentization and automation, with annual output of one million sets of PTO and 1.5 million sets of cylinder.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.26 billion Yuan.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, annual sales income will be about RMB 300 million Yuan and tax RMB 30 million Yuan. It will provide jobs for over 400 persons.

I. Project Name

MEMS Sensor Manufacturing and Sensor Incubation Industrial Park with Annual Output of 2 Million Pieces a Year

II. Project Implementation Agency

Weibin District Investment Promotion Bureau, Baoji City

III. Project Description

This project, having a covered area of 250 mu, is mainly to build a modern high-end MEMS sensor materials, chip, packaging, testing production line and supporting production, office and life facilities. This project mainly aims at aviation, rail traffic, automobile, precision instrument, industrial automation, internet of things and energy sources, focusing on the research development, production and sales of high-end MEMS sensor. After the project is completed, it is planned to form a production capacity of 2 million a year.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB one billion Yuan. Cooperation form: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

As the world's most active IoT application market and the largest electronic product production base, China has consumed nearly 1/2 of the world's MEMS devices. With the in-depth development of IoT technology and applications, its future market has a vast space and great potential. This project can accelerate the development of electronic information and communication industry cluster towards high end and integrated direction in Baoji City. It is of strategic significance to promote Baoji's level of sensor industry and build it as the China's Sensor Capital. After its completion, the annual output value will be RMB 2 billion and the total profit and tax will be RMB 770 million.

Contact Person: Wang Jing

Telephone: 0917-3128183

I. Project Name***Robot Production and Application Integration Project of Intelligent Robot Manufacturing Industrial Park of Baoji City*****II. Project Implementation Agency**

Chencang District Investment Promotion Bureau of Baoji City

III. Project Description

The project has a covered area of 150 mu and total construction area of 117500m². After the project is completed, it can produce 5000 collaborative robots, 2000 intelligent educational robots.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 480 million Yuan. Cooperation form: sole investment, cooperation or cooperation.

V. Anticipation of Market and Analysis of Investment Return

Collaborative robot is a robot designed to interact closely with human beings in the common workspace and can operate in highly unstructured and random environments. The product is mainly applied in industrial and service sector. Due to its safety and flexibility, its importance in manufacturing field is continuously increasing, and resulting in a global effort by both traditional industrial robot giant and the new robot start-ups to actively deploy in the cooperative robot field. After the project meets its production target, it will realize sales income of RMB 790 million Yuan, net profit after will be RMB 130 million Yuan. The investment recovery period is 6.8 years (including construction period)

Telephone: 0917-6216427

I. Project Name***Automobile Components Industrial Park Project of Xi'an Economic Technologies Development Zone*****II. Project Implementation Agency**

Administrative Committee of Xi'an Economic Technologies Development Zone

III. Project Description

Automobile components industrial park of Xi'an Economic Technologies Development Zone has a covered area and it is mainly to introduce such projects as automobile electronics, automobile steering system, automobile controlling system, and entire car intelligent controlling and body decoration. It is mainly to build an automobile components industry cluster and an important supporting industrial base featuring rational layout, improved functions, and coordinated industry development in the West China.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 30 billion Yuan. The Cooperation mode is unlimited.

V. Anticipation of Market and Analysis of Investment Return

Relying on the entire automobile project of Shaanxi Automobile Group Co., Ltd and Geely passenger vehicle, the park is mainly to introduce over 200 upstream and downstream automobile components manufacturers and service enterprises, with the gross industrial output value of RMB 40 billion Yuan and annual business income of over RMB 20 billion Yuan.

I. Project Name***High-efficient Photovoltaic Components Production Project with Annual Output of 5GW of Xi'an Aerospace Industrial Base*****II. Project Implementation Agency**

Xi'an Aerospace Base Administrative Committee

III. Project Description

By introducing the production project of 5GWG high efficiency photovoltaic module, it will construct the cutting workshop, the battery production workshop, the battery test workshop, the component package workshop, the component test workshop, the finished product warehouse, the office room, as well as the power supply, the drivers, the water supply, the drainage, the heating, the vacuum and other supporting facilities.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 3 billion Yuan. The standard workshop shall be built separately.

V. Anticipation of Market and Analysis of Investment Return

Since the foundation of the Aerospace Base, it has been developing the new energy industry represented by solar photovoltaic as one of the leading industries, and the scale of the industry will be expanded gradually. It focuses on the development of high conversion efficiency solar cells and components, system integration, photovoltaic applications and other products. Monocrystalline silicon chip capacity has accounted for 67% of Shaanxi production capacity, solar cell component capacity accounted for 23% of Shaanxi production capacity. Relying on the key enterprises of State Power Investment Cooperation Limited and Longi Stock, the photovoltaic industry chain is mainly composed of silicon material, silicon chip, solar cell and photovoltaic module. The annual output value is expected to be RMB 8 billion, with a payback period of 5 years for land acquisition and 3 years for the government to build the plant.

I. Project Name***Construction Project of Aviation Spare Parts Supply Chain Center of Fuping County*****II. Project Implementation Agency**

Administrative Committee of Fuyan Industrial Cooperation Park

III. Project Description

Having a covered area of 550 mu in Fuyan Industrial Cooperation Park of Fuping County, the project is planned to build aviation standard parts warehousing gathering and supply base. The project, relying on Roc Aviation Company, Tianqu Aviation, Oulitai Electromechanical, is planned to produce aviation standard parts such as fasteners, airframe components and etc.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 4.5 billion Yuan. Investment promotion is adopted.

V. Anticipation of Market and Analysis of Investment Return

Relying on the advantages of the neighboring Xi'an Yanliang National Aviation Industrial Base, the project is planned to build a local aviation product supply chain.

Telephone: 15029029430

I. Project Name***Construction Project of Intelligent Manufacturing Base on Assembly Building in Luyang Lake, Weinan*****II. Project Implementation Agency**

Bureau of Foreign Economic Cooperation of Luyang Lake

III. Project Description

The project is planned to build an intelligent assembly building manufacturing base in Luyang Lake

Development Zone. The park focuses on assembly building materials, derivative nanometer materials and new application, assembling the upstream and downstream industrial chain. In the first stage, it is planned to build the intelligent assembly building base, sci-tech innovation center, design center, training center. The annual production capacity is designed to be 150,000 m³.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 2.6 billion Yuan. Cooperation form: cooperation or joint venture.

V. Anticipation of Market and Analysis of Investment Return

The State Council and Ministry of Housing and Urban-Rural Development of the People's Republic of China put forward the target in 2021-2025 that the assembly building will occupy 30% of the new buildings. The market prospect is broad. Especially the Construction Plan on Weinan City Greatly Promoting Assembly Building Development is put forward. After the project meets its production target, annual production value will be about RMB 500 million Yuan, promoting the employment of over 200 persons. Finally, it will be built a production base of whole industry chain of ecological and green assembly in northwest region.

I. Project Name***Project of Aluminum Alloy Precision Casting for Automobile with Annual Output of 2 Million Pieces in Tongchuan*****II. Project Implementation Agency**

Administrative Committee of Dongjiahe Recycling Economic Industrial Park of Tongchuan City

III. Project Description

The project covers an area of 300 mu (1 mu = 666.6667 m²) and is planned to build a production line of 2 million aluminum alloy precision die-casting for automobile. It can mainly produce the engine cylinder body, cylinder head cover, motor shell, automobile gearbox shell, clutch shell, intake manifold and so on

IV. Total Investment and Cooperation Form

Total investment of the project is RMB one billion Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be RMB 500 million Yuan, profit and tax RMB 100 million Yuan. It will provide jobs for over 100 persons.

I. Project Name***Research Development and Manufacturing Project of Medical Electronics and Electric Equipment of Tongchuan*****II. Project Implementation Agency**

Administrative Committee of Tongchuan New Materials Industrial Park

III. Project Description

This project is intended to collect 150 mu (about 100,000m²) of land in Tongchuan New Material Industrial Park, to carry out R & D and manufacturing project of medical electronic equipment and form the industrialization production of it by adding the key, high efficiency production and auxiliary equipment 84 sets such as static precision tester, constant temperature and humidity box, precise constant temperature liquid bath tank, digital multimeter, doctor leakage current tester and so on.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 500 million Yuan. Joint venture or cooperation is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will form the production size of 2 million sets (pieces) of smart auxiliary equipments including electronic sphygmomanometers, blood glucose test meters, electronic thermometers, ear thermometers, and potential therapeutic apparatus, low-frequency therapy apparatus, and laser therapeutic apparatus etc.

I. Project Name

Airplane Maintenance and Refitting Project of Shaanxi Aircraft Industry (Group) Corporation Ltd.

II. Project Implementation Agency

Shaanxi Aircraft Industry (Group) Co., Ltd

III. Project Description

Relying on airplane maintenance and refitting resources of Hanzhong Civil Airport and Shaanxi Aircraft Industry (Group) Co., Ltd, it is to introduce strategic investors with international and home aviation maintenance qualification and technologies to establish a joint company of airplane maintenance and refitting in Hanzhong Aviation Wisdom New City. Having a land requisition of 400 mu and construction area of 150,000 m², purchasing 200 sets of equipment involving airplane testing, assembly and debugging, the project is to carry out the military and civil use airplane maintenance and refitting business.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB one billion Yuan. A joint venture company will be established

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual income of RMB 500 million Yuan will be realized.

Contact Person: Xing Zengzhi

Telephone: 0916-2887899

I. Project Name***Construction Project of Hanzhong General Aeronautics Airplane Production Line*****II. Project Implementation Agency**

Hanzhong High-Tech Industry Development Investment Co., Ltd.

III. Project Description

The project is planned to build the general aviation airplane production line in Hantai District of Hanzhong. The net land-using area of this project is 60,000 m² (about 90 mu) and the total construction area is 53500 m². Of which, it is planned to build airplane body workshop, preassemble workshop, assembly shop, spray coating workshop, factory inspection workshop, airplane finished products warehouse, office, employee dormitory, meanwhile, it is to build the facilities of water supply, fire control, heating supply, power supply, communication etc, purchase 3 general airplane production lines which can produce 100 training planes and 200 general airplanes.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 468 million Yuan. Sole investment or joint venture is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, annual prospective business income: RMB 900 million

Yuan (including tax); annual total cost: RMB 600 million Yuan; annual net profit: RMB 120 million Yuan; annual total tax contribution: RMB 90 million Yuan; annual return rate of investment: 25.60%. The investment recovery period is 7 years.

I. Project Name***Research Development and Manufacturing of Precision Medical Treatment Equipment and Medicine Translation Center Project*****II. Project Implementation Agency**

Investment Promotion Bureau of Hanzhong Economic Technologies Development Zone

III. Project Description

The project focuses on the Research Development and Manufacturing of Precision Medical Treatment Equipment and Medicine Translation Center Project. It will be built by two stages. In first stage, it is planned to rent 2000 m² of office building to develop research development pilot center, basic precision medical treatment incubation acceleration center integrating cancer screening, chronic disease detection, gene detection and 5G family health; in the second stage, having a land using area of 60 mu and total construction area of 45300 m², the project is planned to build the precision medical treatment equipment industrial park, to develop the research and development and production of 5G all-in-one machine for family health, the research and development and production of family health robots and the production of family medical apparatus etc.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 533 million Yuan. Cooperation form: joint venture, cooperation or sole investment.

V. Anticipation of Market and Analysis of Investment Return

At present, the market size in precision medical treatment field of the whole world has exceeded US\$ 60 billion. In the future 5 years, the global market is increasing at a speed of 15%. Because the population base of our country is huge, the precision medical treatment market has a huge market space. After the project meets its production target, it will realize business volume of RMB 480 million Yuan. The investment recovery period of the project is 7 years (excluding the construction period).

I. Project Name***Research and Development and Production Project of 300,000 Pieces/Year Batteries, Motors and Electric Controls System in Baoji City*****II. Project Implementation Agency**

Investment Cooperation Bureau of Baoji High-Tech Industries Development Zone

III. Project Description

With an area of 500 mu, the project is to mainly construct power battery production line, permanent magnet synchronous motor production line, motor controller automatic production line and auxiliary facilities for production, office, living, etc, and to establish “electricity, telecommunication, broadcasting and TV facilities” R&D laboratory, which aims to develop “electricity, telecommunication, broadcasting and TV facilities” by advanced technology to provide high energy density batteries and high performance electric drive system for new energy vehicles. After the project is completed, it will form a production ability of 300,000 Pieces/Year Batteries, Motors and Electric Controls System in Baoji City.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 4 billion Yuan. Cooperation form: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The “electricity, telecommunication, broadcasting and TV facilities” determine the width and breadth of new energy vehicles in the future industrial development. In the production process of new energy vehicles, battery cost accounts for 42%, and electric motor control cost accounts for about 20%. In 2018, the sales volume of new energy vehicle of our country reached 1.256 million, an increase of 61.7% than that of last year. At the same year, the total installation capacity of power battery enterprises of our country reached 57.35GWh, an increase of 57%, the quick increase of new energy auto consumption widened the industrial scale of Batteries, Motors and Electric Controls System. As the core technology project of developing NEV industry in Baoji city, the project will drive the rapid development of NEV and related supporting industries in Baoji city. The project will achieve an annual output value of RMB 8 billion and a total profit and tax of RMB 1.9 billion after completion.

Telephone: 15809176272

I. Project Name***Railway Engineering Vehicles Research Development, Achievement Transformation and Its Production Line Project in Baoji City*****II. Project Implementation Agency**

Jintai District Investment Promotion Bureau, Baoji City

III. Project Description

The project, having a covered area of 2000 mu, is mainly to build the railway engineering vehicles research development center, modern production lines and the matched production, office and life facilities. After the project is completed, it is mainly used for the research, technical overcome and production of new-type railway engineering vehicles. The Project Proposal has been completed.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 5.57 billion Yuan. Cooperation form: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

With the constant approaching of railway traffic construction of our country and the exportation to the whole world, the railway traffic enterprises have obvious development advantages, huge potential and broad market prospect. After the project meets its production target, annual production value will be RMB 12 billion Yuan and total profit RMB 3.91 billion Yuan.

Contact Person: Niu Shuanhu

Telephone: 15353797187

I. Project Name***Production Base Project of Key Robot Components of Baoji City*****II. Project Implementation Agency**

Weibin District Investment Promotion Bureau, Baoji City

III. Project Description

The project, having a covered area of 350 mu, is mainly to build public service area and key robot components industrial area. The public service area includes Research and Development Office Building, Robot Experiencing Hall, Production Base Service Center and Robot Inspection Center and etc; the industrial area mainly includes standard production workshop, supporting office and life facilities. After the project is completed, it is mainly to provide core components research development and production gathering platform, produce RV speed reducers, harmonic speed reducer of precision speed reducers, robot raw material (stainless steel, heat insulating material, carbon fiber, resin composite materials, rare earths, etc), sensor, actuator and various key robot components production enterprises, forming a substitute of imported robot components.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.7 billion Yuan. Cooperation form: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

In recent years, the robot industry of our country has been developing drastically. In 2018, the market scale was USD 8.74 billion, an increase of 39.2%. The development of robot industry faces an unprecedented market opportunity. As the gap between the development of the home brand technology and foreign-funded enterprises become shorter and shorter, the competitiveness of home brand products become stronger. The home-made core components have huge space. The construction of the project will strengthen the overall development level of the whole robot industry and the capacity substituting imported products with the core components of our country. After the project meets its production target, annual production value will be RMB 3.6 billion Yuan and total profit and tax will be RMB 2.24 billion Yuan.

Contact Person: Wang Jing

Telephone: 0917-3128182

I. Project Name***Construction Project of Industrial Robot Controller Production Line with Annual Output of 50,000 Pieces*****II. Project Implementation Agency**

Chencang District Investment Promotion Bureau, Baoji City

III. Project Description

Having a covered area of 100 mu, the project is mainly to build the industrial robot controller production line and supporting facilities involving production, office and life. After the completion of the project, the project is expected to form the production capacity of annual output of 50000 pieces of industrial robot controllers, which are mainly standard modular controllers used for robot model and non-standard robot. Such control supports secondary development interface, which is convenient for communications with third party equipment and helps to provide complete sets of industrial robot control solutions.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 520 million Yuan. Cooperation form: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

Controller, as the core component of industrial robot, accounts for about 12% of robot cost. In China, robot controller will also face unprecedented development opportunities. The project will further improve the R&D and production capacity of the robot industry and enhance the level of intelligent manufacturing industry in Baoji City. After the project is completed, it is estimated to reach the annual output value of RMB 1 billion and total profit and tax of RMB 620 million.

Liquan County Investment Promotion Bureau

III. Project Description

Since the reform and opening up, China's animal husbandry in China has made remarkable achievements. The scale of animal husbandry production has been continuously expanded, its total amount has been greatly increased, and its quality also been continuously improved. In 2019, more than 1 million pigs were fattened in Liquan and surrounding counties, and there were sufficient resources for the construction of meat processing projects. The project is planned to be located in Liquan Food Industrial Park and it covers an area of 100 mu and it is mainly to build meat processing workshop, boiler room, 6 meat processing production lines, and purchase related machinery and equipment.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 300 million Yuan. Cooperation form: sole investment or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, annual production value of RMB 400 million Yuan and tax contribution of RMB 9 million Yuan will be realized. The project may provide over 60 employment positions.

III. Project Description

Based on the biological resources and plant extraction industry of Fufeng County, it is to promote a key investment promotion project. Through building the production base of nutrition supplemental and the healthcare products, it will promote the upgrade of biological medicine industry of the Fufeng County. The project has a total covered area of 120 mu and the construction area of 80060 m². In the early period, it is planned to build the production and packing workshop of nutrition supplemental, raw materials warehousing and finishing products warehousing facilities, administrative office buildings, research and development inspection building, employees dormitory, dining-halls and matched life facilities and comprehensive supporting facilities involving sewage treatment, electric power, fire control, safe and security. In far future, it is planned to build the exhibition, exchange and factory tourism facilities. After the first stage of the project is put into production in the second year, it will produce 5 million bottles (pots). The production capacity will be enlarged to 8 million bottles (pots) within 6 years. The Project Proposal has been completed.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 500 million Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the project is put into production, the net profit will be RMB 82.5 million Yuan and the tax contribution of the local government will exceed RMB 21 million Yuan. The profit rate of the investment of the project is about 26% and the investment recovery period is 6 years.

III. Project Description

Royal jelly has functions of nourishing, benefiting liver, strengthening the spleen, strengthening the body resistibility and promoting the growth. Long time taking royal jelly may stimulate the appetite, strengthen the body quality, enhance the energy and make people have a good sleep.

The project has a total covered area of 105.3 mu and total construction area of 58723 m², including the production processing area, auxiliary production area, comprehensive service area and project matched area. After the project is completed, it may produce 200 tons of active royal jelly, 120 tons of royal jelly oral liquid, 40 tons of frozen dried royal jelly powder and 30 tons of royal jelly buccal tablet. The project proposal has been completed.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 227 million Yuan. Cooperation form: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

Royal jelly series healthcare products with special healthcare function become more and more popular among persons of different ages, especially the old persons who have requirements on body. It will greatly stimulate the market demand of the health care products with high nutrition and high healthcare value. After the project is completed, it will realize annual sales income of RMB 340 million Yuan and net profit after tax RMB 60.12 million Yuan. The investment recovery period is 5.3 years (including the construction period.)

Contact Person: Niu Shuanhu

Telephone: 15353797187

I. Project Name***Pawpaw Series Products Development Project of Baihe County*****II. Project Implementation Agency**

Baihe County Investment Promotion Center

III. Project Description

Baihe County has rich resources. At present, the pawpaw planting area of Baihe County is 140,000 mu, in full fruit period, the pawpaw output will reach 200,000 tons. It has established a long-term cooperation with the Food Science and Engineering School of Northwest A & F University. Relying on the pawpaw planting technologies and research and development of the products, it focuses on scientific research, guaranteeing that the application field of smooth skin pawpaw takes the lead in whole country. The project is planned to build the production lines of pawpaw wine, pawpaw vinegar, pawpaw plumet health tea, lyophilize powder, pawpaw essence, pawpaw commodity and leisure pawpaw snack to produce and process pawpaw series products.

IV. Total Investment and Cooperation Form

Total investment of the project is estimated to be RMB 120 million Yuan. Cooperation form: joint venture, cooperation, buy out or sole investment.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed and put into production, annual sales income will be RMB 170 million Yuan, profit and tax RMB 60 million Yuan. The investment will be recovered within 3 years.

I. Project Name***10.5/11 Generation TFL-LCD Panel Production Line Project in Xianyang*****II. Project Implementation Agency**

Administrative Committee of Xianyang High-Tech Industries Development Zone

III. Project Description

The project, having a covered area of 1500 mu, is mainly to produce the liquid crystal display (LCD) of ultra high-definition with the size larger than 65 inches.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 45 billion Yuan. Cooperation form: cooperation or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The 10.5/11 generation line is a challenge to the world's highest generation line. It not only brings better economic benefits to enterprises, but also has a wide range of social benefits. It is of great strategic significance to support China's semiconductor display industry.

Contact Person: Wang Ning

Telephone: 13571006390

I. Project Name***Flexible AMOLED Display Screen Project of Xianyang*****II. Project Implementation Agency**

Administrative Committee of Xianyang High-Tech Industries Development Zone

III. Project Description

The project is mainly to produce 6.5 AMOLED high-definition touch display modules with a monthly output of 4 million (resolution ~ 1,000 ppi), about 15,000 pieces per month for G6 in Xianyang High-Tech Zone.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 23.4 billion Yuan. Cooperation form: cooperation or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The state-owned technology under a generation of soft AMOLED built-in touch screen, intended to be built as the project, is more in line with the national strategy of supporting the emerging display industry, and can bring the entire panel industry transformation and upgrading.

Contact Person: Wang Ning

Telephone: 13571006390

I. Project Name***12-inch Wafer Chip Industry Manufacturing Base Project of Xianyang*****II. Project Implementation Agency**

Administrative Committee of Xianyang High-Tech Industries Development Zone

III. Project Description

Having a covered area of 1000 mu, the project is planned to build a 12-inch analog integrated circuit chip production line with annual production capacity of 40,000 pieces.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 23 billion Yuan. Cooperation form: sole investment or cooperation.

V. Anticipation of Market and Analysis of Investment Return

In recent years, relying on CEC, Xianyang High-Tech Industries Development Zone has attracted a large number of upstream and downstream supporting enterprises, and solved the difficulties of the lack of screen in the western region. The introduction of the project into Xianyang High-Tech Industries Development Zone can solve the chip shortage in the western region. By better development of new display industry exhibition, it will constantly promote the vertical and horizontal extension of the industry

I. Project Name***12- Inch Memory Chip Packaging Project of Xianyang High-Tech Industries Development Zone*****II. Project Implementation Agency**

Administrative Committee of Xianyang High-Tech Industries Development Zone

III. Project Description

The project, having a covered area of 50 mu in Xianyang High-Tech Industries Development Zone, is planned to build the production workshop of about 64000 m² and build 12-inch memory chip packaging production line project.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB one billion Yuan. Cooperation form: cooperation or sole investment

V. Anticipation of Market and Analysis of Investment Return

As the matched project of 12-inch chip industry manufacturing base, it is indispensable during the industry development. It has great strategic significance for chip industry to be stronger.

Contact Person: Wang Ning

Telephone: 13571006390

I. Project Name***Stem Cell Preparation Industrial Park Project of Xianyang City*****II. Project Implementation Agency**

Administrative Committee of Xianyang High-Tech Industries Development Zone

III. Project Description

Having a planned area of 800 mu in Xianyang High-Tech Industries Development Zone, the project

is planned to build cell treatment development and preparation platform integrating new technology

development of cell treatment, the research and development of cell production process, virus carrier production process, GMP production of virus carrier, CGMP production of cell treatment and cell bank establishment. The project lies at the planning and packing stage.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 20 billion Yuan. Cooperation form: cooperation or joint venture.

V. Anticipation of Market and Analysis of Investment Return

The project has obvious promotion effect, which can gather more high-end medical equipment and cell preparation enterprises. The industrial park is developing quickly.

Contact Person: Wang Ning

Telephone: 13571006390

I. Project Name***Semiconductor Sealed Production Base Project of Xixian New Area*****II. Project Implementation Agency**

Administrative Committee of Fengdong New City of Xixian New Area

III. Project Description

This project mainly carries on the high-pixel image sensing module, the automobile-class power device and the module, the follow-up package production, the test processing and the sale, covering an area of 300 mu. It will adopt advanced packaging technology, such as 3D image module integration, high-pixel as well as array camera module and test technology, to build production line of mass production scale and workshops and auxiliary facilities supporting it.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 2 billion Yuan. Cooperation form: cooperation.

V. Anticipation of Market and Analysis of Investment Return

China's semiconductor industry is in the high-speed development period. The domestic sealing and testing links occupy more than 25% of this industry output value with sales volume exceeding RMB 150 billion in 2016, and it is the pioneer of this industry. The project, adjacent to Xi'an High-Tech Industries Development Zone in the south, neighboring Xi'an Economic Technologies Development the north, will fully take Xi an's industrial advantages in the IC industry, forming a good interaction with Samsung, Meiguang, Huatian Technology and other enterprises, to bring enormous economic benefits for enterprises.

I. Project Name***AR/VR Industrial Base Project of Xixian New Area*****II. Project Implementation Agency**

Administrative Committee of Fengdong New City of Xixian New Area

III. Project Description

The project, located at scientific technology resources coordinating demonstration base, relying on the artificial intelligence technological study and development status of famous universities such as Xi'an Jiaotong University, Xidian University and etc, is mainly to build AR/VR industrial base, research institute, maker space, the first exchange platform of AR culture contents in northwest region, building a AR/VR industry cluster integrating hardware, software and property rights exchange.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 100 million Yuan. Cooperation form: investment or cooperation.

V. Anticipation of Market and Analysis of Investment Return

Relying on the talents advantages of Shaanxi Province, edge technologies will be greatly developed. It is planned to build the leading artificial intelligent industrial base. After the project is completed, it will cultivate and assemble over one hundred AR/VR enterprises and promote upstream and downstream enterprises to create production value of RMB 20 billion Yuan. The tax contribution of RMB one billion Yuan will be realized.

I. Project Name***Independent and Controllable Chip Production Base Project of Xi'an Aerospace Industrial Base*****II. Project Implementation Agency**

Administrative Committee of Xi'an Aerospace Industrial Base

III. Project Description

Xi'an Aerospace Industrial Base is to build the National Supercomputing (Xi'an) Center. Relying on the supercomputing center project, Xi'an Aerospace Industrial Base focuses on building the industrial cluster of "server+ cloud computing +Chip" and the high-performance computing industrial park with a covered area of 3000 mu. The project is planned to introduce the research development and production project of independent and controllable chip to promote to realization of independent and controllable server of our country. Relying on the National Supercomputing (Xi'an) Center and high-performance computing industrial park, Xi'an Aerospace Industrial Base is planned to attract IC manufacturing enterprises and technical group to build the Research and Development and Production Project of Independent and Controllable Chip and manufacture chips of memory, CPU, GPU, artificial intelligence and power components.

IV. Total Investment and Cooperation Form

The investment amount on chip research and development project is not restricted. The total investment of the chip manufacturing is not less than RMB 3 billion Yuan. It is suggested that the research development is attracted to reside in the National Supercomputing (Xi'an) Center. The manufacturing projects will be implemented through purchasing land. Administrative Committee of Xi'an Aerospace Industrial Base may coordinate with the provincial and municipal government. The National and Shaanxi IC Industry Fund will give related support. Meanwhile, according to the actual situation, Xi'an Aerospace Industrial Base may provide support in market, policies and capital.

V. Anticipation of Market and Analysis of Investment Return

After the project for chip manufacturing is put into production, annual production value will not be less than RMB1.5 billion Yuan.

I. Project Name***Research and Development and Manufacturing Project of Business Space Satellite of Xi'an Aerospace Base*****II. Project Implementation Agency**

Administrative Committee of Xi'an Aerospace Base

III. Project Description

Xi'an Aerospace Base takes the area initializing of aerospace industry, strategic emerging industry, scale development. It has formed a batch of national aviation and business aviation enterprises of the Fourth, Fifth, Sixth, Ninth Academy of China Aerospace Science and Technology Corporation, North General Electronics Group of China North Industries Group Corporation Limited, National Time Service Center, Chinese Academy of Science, Institute of Remote Sensing and Digital Earth Chinese Academy of Sciences, Aerial Photogrammetry and Remote Sensing Bureau, Galaxy Space, Beijing Interstellar Glory Space Technology Co., Ltd. AA Engine, China Star, GEOVIS, China Science Sky Pagoda. The base is planned to introduce Business Space Satellite and the research development and manufacturing of core components.

IV. Total Investment and Cooperation Form

Total investment of this project is not less than RMB 200 million Yuan. Cooperation form: the enterprise is to build the research and development and manufacturing project of business space satellite through residing in our standard workshop or purchasing the land separately. Administrative Committee of Xi'an Aerospace Base may give policy support to enterprises according to the actual situation.

V. Anticipation of Market and Analysis of Investment Return

Aviation industry has higher industry cluster, strong policy support, it has the conditions and environment for the development of civil and business space enterprise. The project resided in the plant will be put into production within 3 months and the project through purchasing land will be put into production within 3 years.

I. Project Name***Industrialization Upgrade of 3D Printing Industry Cultivating Base of Weinan High-Tech Industries Development Zone*****II. Project Implementation Agency**

Torch Sci-Tech Development Co., Ltd of Weinan High-Tech Industries Development Zone

III. Project Description

The project is planned to build 8 professional system innovation platforms including 3D printing equipment sharing platform, testing and inspection platform, application demonstration platform and etc.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 300 million Yuan. The investment promotion is adopted.

V. Anticipation of Market and Analysis of Investment Return

3D printing industry in Weinan has formed a certain scale, but the capacity of research and development and scientific achievement transformation still need further upgrade. The implementation of this project may provide information release, testing and inspection, application demonstration for research development, pilot test and industrialization of related 3D printing enterprises.

Contact Person: Ma Dingyu

I. Project Name***Fine Processing Project of Optical Components and Electronics Components of Tongchuan*****II. Project Implementation Agency**

Administrative Committee of Tongchuan New Materials Industrial Park

III. Project Description

The products of this project are mainly mobile camera module and mobile electronic components. The project belongs to the encouragement industry of national information industry and strategic emerging industry, which has a good policy background. The total land using area is planned to be 100 mu and it is to newly build new raw materials, finished products and packaging warehouse of 8000m², new production workshop of 50000m². The matched office buildings, staff dormitory, sewage treatment station and so on are planned to be built. The project is planned to purchase all kinds of equipment 213 (sets). After the project is completed, an annual production scale of 1 million sets of camera modules and 1 million sets of electronic components for mobile phones (including resistors, capacitors, potentiometers, electron tubes, radiators, electroacoustic devices, sensors, substrates for printed circuits, etc.) can be formed.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 350 million Yuan. Cooperation form: sole investment joint venture.

V. Anticipation of Market and Analysis of Investment Return

With Samsung, ZTE and others located in Xi'an, the advantages of electronic information manufacturing industry with mobile phone and its components production as the main are gradually obvious and have great potential.

Telephone: 0919-3586032

I. Project Name***Aviation New Materials Production Line Project of Tongchuan City*****II. Project Implementation Agency**

Administrative Committee of Tongchuan New Material Industrial Park

III. Project Description

The project, having a covered area of 150 mu in New Materials Industrial Park of Tongchuan, is planned to build the carbon fiber resin composite production line with annual output of 30,000 tons. The main construction contents: comprehensive administration center, research and development space, supporting employee flat, auxiliary room and road, parking lot, green space and other auxiliary engineering.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 550 million Yuan. Cooperation form: joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, the annual production capacity is 30,000 t/y carbon fiber resin composite. After the project is put into operation normally, annual business income will be RMB 576 million Yuan, annual income tax contribution RMB 42.84 million Yuan. The project can effectively solve the employment and reemployment of fresh graduate, social idle personnel and poor farmers.

I. Project Name***Taihua Anti-tumor Biological Preparation Project of Luonan County*****II. Project Implementation Agency**

Luonan Taihua Natural Biological Pharmaceutical Co., Ltd.

III. Project Description

In Taoling Industrial Park of Luonan County, the project is planned to build the production line of paclitaxel injection with an annual output of 100,000 boxes, including raw materials production workshop, raw material extraction workshop, preparation production workshop and other supporting facilities. The project has a covered area of 30 mu and the construction area of 22,000 m².

IV. Total Investment and Cooperation Form

Total investment of the project is estimated to be RMB 55 million Yuan, of which, the engineering cost is RMB 48 million Yuan, preparation fee is RMB 1.75 million Yuan. Cooperation form: joint venture, cooperation or other forms.

V. Anticipation of Market and Analysis of Investment Return

Tumour treatment has its specificity. The patient needs receiving scientific and formal treatment in the whole course to delay the development of the tumour or prevent the recurrence of tumour. Therefore, the increase of incidence of a tumour and the decrease of the death rate mean that the probability of the long-term treatment will increase and result in the increase of the demands of drugs. After the project is completed, it is estimated that annual sales income will be RMB 120 million Yuan, profit RMB 27 million Yuan, tax RMB 14 million Yuan. It can provide jobs for 150 persons. The project has better economic and social benefits.

I. Project Name***Shanyang Henghuan Low-Molecular-Weight Heparin Sodium Series Product Project*****II. Project Implementation Agency**

Shanyang County Hengheng Biological Technology Co., Ltd.

III. Project Description

In the industrial concentration area of Shanyang County (via Silu East), a production line for purification and processing of Low-molecular-weight Heparin Sodium has been built, with an annual output of 800 billion units of Low-molecular-weight Heparin Sodium, used for producing Enoxaparin sodium injection, Dheparin injection, Naqu heparin calcium injection, Heparin cream, Heparin blood-collecting tube and other products. At the same time, more than 5,000 kg of bilirubin, amino acids and insulin were extracted from raw materials such as pig gall bladder, pig hair and pig pancreas. The project covers an area of 150 mu (about 100,000 m²), including 66,000 m² of base area, 15,000 m² of hardened road and site area, and 19,000 m² of green area.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB one billion Yuan, including building investment of RMB 880 million Yuan, interests of RMB 57 million Yuan in the construction period, initial fluid capital of RMB 63 million Yuan. The capital may be obtained through enterprises' self-financing of RMB 350 million Yuan, bank loan and the special funds of the state of RMB 650 million Yuan. Joint venture, cooperation or other forms may be acceptable.

V. Anticipation of Market and Analysis of Investment Return

As one of the most widely used and effective anticoagulant and antithrombotic drugs in clinical practice, heparin drugs occupy an important position in the international medical market, with a huge demand in the market and broad market prospect. After the project is completed, annual sales income of RMB 1.2 billion Yuan, profit of RMB 300 million Yuan and tax of RMB 75 million Yuan will be realized. It can provide jobs for 500 persons and the economic and social benefits are considerable.

Contact Unit: Shanyang County Hengheng Biological Technology Co., Ltd.

Contact Person: Tong Dan

I. Project Name***Construction Project of High Performance Fiber Reinforced Composite Product in Yangxian*****II. Project Implementation Agency**

Yangxian County Investment Promotion Service Center

Administrative Committee of Yangxian County Modern Materials Industrial Park

III. Project Description

High Performance Fiber Reinforced Composite is an indispensable basic material for optical light source, optical energy, aviation and aircraft and other industry. It has a key function in key engineering project, aviation and aircraft, semiconductor and industry. The project, having a covered area of 80 mu in Yangxian Modern Materials Industrial Park, is planned to introduce the high-performance reinforced composite project. The construction period is 2 years.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 300 million Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target completely, it is estimated that annual sales income will be RMB 300 million Yuan and the whole cost will be recovered within 6-7 years.

Contact Person: Wang Chao

Telephone: 0916-8222612

I. Project Name***Passive Components Production and Manufacturing Project of Baoji City*****II. Project Implementation Agency**

Investment Promotion Bureau of Panlong New District

III. Project Description

The project is aimed to produce various passive components, mainly including chip multi-layer ceramic capacitors (MLCC), aluminum electrolytic capacitors, chip inductors and dielectric filters. After fully put into operation, the project will realize the annual capacity of 800 million pieces of MLCC, 360 million pieces of aluminum electrolytic capacitors, 10 billion pieces of chip inductors, and 30 million pieces of dielectric filters.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.045 billion Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

Passive components are widely used in consumer electronics, automobiles, home appliances, etc. Thanks to the changes in the downstream market, capital investment and technological upgrading, China's passive components market keeps strong demand. The recent years' strategic adjustment of Japan and South Korea enterprises lead to the supply shortage and price increase of the market. The production capacity of passive components is transferred to the continent. The manufacturers of the continent meet development opportunities. The total investment of the project is estimated to be RMB 1.045 billion Yuan. After completion of the project, the average annual after-tax profit is up to 238 million Yuan, and the investment can be recovered in seven years.

I. Project Name***Carbridge and Electronics Information Industrial Park Project of Baoji City*****II. Project Implementation Agency**

Investment Promotion Bureau of Caijiapo Economic Technologies Development Zone of Baoji

III. Project Description

The park, having a covered area of 500 mu, is separated into three areas of public service area, carbridge area and electronics information area. The project is mainly to build the research and development buildings, an exhibition center and a service center in public service area; build standard workshop, office and matched life facilities in carbridge area and electronics information area. The park is mainly to introduce industrial chain enterprises involving motor control system, chassis control system, safety system, car electronics, car electronics products, and engineering mechanical electronics control system as well as the manufacturing enterprises of IC, electronics micromotor, electronics cable, fiberoptic cable, vacuum electronics components, electronic components and other electronics information products.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 500 million Yuan. Cooperation form: cooperation form, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The manufacturing level of car electronics is a sign to balance the auto intellectualization level. It has become the only way for the development of auto informationization and intelligentization. Carbridge electronics information industrial park project is the core project to meet the trend of information and intellectualization development and speed up the development of high-end intellectualized manufacturer. After the park is completed and put into operation, annual production value will reach RMB 5 billion Yuan and total profit will reach RMB 1.4 billion Yuan.

I. Project Name***The Children Park Project of Yan'an New District*****II. Project Implementation Agency**

Administrative Committee of Yan'an New District

III. Project Description

The project is located at the east side of Yan'an Theater and the Culture Park, it borders Lu Xun Art Ecological Park. The total land area is about 7.52 ha (conversion into 112.8 mu). The project is separated into four blocks by Zichang Road and Juyuan Road. It neighbors Ruijin Road in the West, North Xingzhi Road in the north and Zhonghuan Road in the south. The land in surrounding area is for culture, business, hospital and scientific education. The resources in surrounding area bring users at different age for the Project; meanwhile, it will bring public usable resources for the project. The park has a total construction area of 5027m² and it belongs to the building for management, service, catering and entertainment. Of which, the fantasy city is 1951 m², the exploration area is 1106 m², venture island area is 1886m², Fantasy Park is 84m².

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 140 million Yuan. Cooperation form: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual tourist reception capacity in the first year will be 216000, the tourist reception capacity in the stable period will reach 240,000. It is estimated that annual operating income will reach RMB 35.2 million Yuan.

I. Project Name***The Second Stage of the Shantytown Reconstruction Project of the Eight-Immortal Temple*****II. Project Implementation Agency**

Administrative Committee for Comprehensive Reconstruction of Dongguan Area of Beilin District, Xi'an City

III. Project Description

This project starts at Jinglong Pool and Xinqing Lane in the east, ends at South Street of Wudao Crossing and the North Street in the west, starts at Dongguanzheng Street and Shiyuan Road in the South and ends at Yongle Road in the north. It covers an area of about 515mu, involving 8235 families of 24420 persons. The various types of housing with total construction area of 558000 m² are requisitioned. At present the land requisition is being done.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 12.875 billion Yuan. Cooperative development is adopted.

Contact Person: Wang Yaru

Telephone: 029-8323 0051

I. Project Name***The First Stage of the Shantytown Reconstruction Project of Lintong Railway Station, Xi'an*****II. Project Implementation Agency**

Lintong Urban Construction (Group) Co., Ltd of Xi'an

III. Project Description

The project belongs to a shantytown reconstruction project on state-owned land. It belongs to a municipal and district key project that was planned to use the loan of China Development Bank by Department of Housing and Urban-Rural Development of the province. The project is located in the area along the Longhai Railway near Lintong Railway Station. It starts at the east fence of the Construction Machinery Co., Ltd of China Railway First Bureau Group., reaches Xi'an Railway Mechanization Engineering Co., Ltd in the west., connects the south boundary of Jiangzhai New Village and north planning road of south of Qinhan Avenue of Xi'an Siyuan Kechuang Railway Technology Co., Ltd from the north to the south. The TV Play World of Plainness ever found scenes here, the old site of Lintong Railway Station. Total covered area of the project is about 914 mu, and the planned relocation area is about 727 mu, of which, the resettlement area covers 78.9 mu and the developing land is about 560 mu, and the total construction area of the planned residential, commercial and educational areas is 663,600m². The total investment is planned to be RMB 3 billion Yuan. The demolition work of the project has entered the closing stage.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 3 billion Yuan. Cooperation form: cooperation.

V. Anticipation of Market and Analysis of Investment Return

The project is located in a place with obvious advantages and strong representativeness. Lintong Railway Station was a representative building in the period of the Republic of China. It belongs to historical cultural relics and historical sites. It has great development potential and can support the market demand of the project. The project has good construction conditions and surrounding environment. The transportation is very convenient. China Railway Xi'an Group Co., Ltd. is planned to open a special train for tourism. The location is a hub of turnover center and can fully mine the tourism industry in the whole Lintong, with huge appreciation space and obvious competitive advantage.

I. Project Name***Comprehensive Reconstruction Project of South Area of Xiguanzheng Street, Xi'an City*****II. Project Implementation Agency**

Investment Cooperation Bureau of Lianhu District, Xian

III. Project Description

The project lies at the south side of Xiguanzheng Street of Lianhua District. It starts at West Huancheng Road in the north, ends at South Laodong Road in the west, connects Fengqing Road and Xiguanzheng Street from south to north. It is planned to build a culture and trade street area integrating cultural tourism, business trade and housing. It focuses on the development of headquarters economy and street economy. The project has a planned area of about 599 mu, of which, the net land using area is 529mu and the land is for business and housing. The total construction area is about 1.4 million m², of which, the building above the ground is 700,000 m² and the building under the ground is 700,000 m².

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 11.7 billion Yuan. Cooperative development is adopted.

V. Anticipation of Market and Analysis of Investment Return

Located at outside of west gate (Anding Gate) of old city Xi'an, it is adjacent to West Ring Road and Anding Station of Metro No. 6 in construction. It has favorable traffic condition. The historical culture connotation is profound. The culture, tourism and business value is huge.

I. Project Name***Yangling Intelligent Agriculture Valley Project*****II. Project Implementation Agency**

Construction Headquarters of Yangling Intelligent Agriculture Valley

III. Project Description

Intelligent Agriculture Valley is planned to be built by the plan of “One Core, Five Parks and Three Blocks”.

“One core”. It is to build the intelligent agriculture service center through base construction and satellite communication and such technologies as positioning, remote sensing, 5G, big data, cloud computing, internet of things, artificial intelligence, civil aviation and block chain and build the intelligent agriculture supporting system integrating in modern agriculture and future agriculture brain.

“Five Parks”. It is to build the high standard intelligent agriculture demonstration park through the research development, introduction, assembly and matching of high agriculture technologies. First is to build the world agriculture window covering an area of 3470mu through introducing updated intelligent agriculture technologies. It will exhibit intelligent agriculture, creative agriculture, ecological agriculture, future agriculture development orientation to lead the agriculture development of China; second is to build the intelligent seed park covering an area of 3364 mu through technologies of gene editing and big data seeds cultivation to build an integrated seeds enterprise from seeds development. It is to solve national grain safety problems; the third is to focalize intelligent planting, biological control on plant diseases and insect pests and soil pollution prevention to build the intelligent fruit and vegetables park covering an area 5180mu, radiating, promoting and speed up agricultural artificial intelligence in order to solve problems on agriculture production efficiency, food safety and agriculture ecological problems; fourth is to build intelligent agriculture park covering an area of 2884 mu through introducing agricultural technologies, green agriculture processing and green food production and modern sales mode research and development; it is to build the agriculture enterprise incubators to drive intelligent agriculture and agriculture sustainable development with technological innovation. Fifth is to build the village integration park covering an area of 5565mu to build a sample according to requirements involving a good team, a good plan, a good industry, a good enterprise, a good organization, a good village, a good family, a good mechanism and a new internet.

“Three Blocks”. Focusing on intelligent agriculture technologies, equipment exhibition and training, the integration development of first, second and third industries, online and off-line exhibition sales of green agricultural products and green food, it is planned to build an intelligent agriculture street area covering an area of 1422 mu; relying on Yangling Free Trade Zone, it is planned to build a comprehensive bonded zone covering an area of 838 mu; taking providing information exchange, innovation development and life platform for enterprises at home and abroad, it is planned to build an international enterpriser innovation community with complete functions covering an area of 569 mu.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 10 billion Yuan. Sole investment or joint venture is acceptable.

V. Anticipation of Market and Analysis of Investment Return

Taking agriculture 4.0 of intelligent agriculture as the building target, after the project is completed, it will lead the development orientation of modern agriculture of China and it belongs to a project of large investment and high yield. The investment recovery period of the project is 4-5 years.

I. Project Name***Construction Project of Yan'an Intelligent Sorting and Cold Chain Logistics System*****II. Project Implementation Agency**

Yan'an City Investment Promotion Bureau

III. Project Description

In the first stage, the project is planned to build 10 places in the fruit areas of the whole city. Each place has a planned area of 150 mu. The construction contents include: building an integration workshop of fruit sorting and packing, supporting raw materials warehouses, products warehouses, package workshop and auxiliary facilities; building 2 international top-ranking modern intelligent apple sorting lines, fruit processing capacity is over 20 tons an hour. It is to build cold warehouse of apples, rooms for freezing machines and compressors, quick-freezing and pre-cooling workshops, power distribution room, buffering room, equipped with cold transportation vehicles. After it is put into production, the fresh fruits warehousing capacity is 20,000 tons. It is planned to build an apple exchange center integrating wholesales, logistics, online exchange and comprehensive service. It sets the apple wholesales exchange area, processing and warehousing area, logistics center, inspection center, administrative service center, connecting agricultural products information network and electronic exchange system.

IV. Total Investment and Cooperation Form

Total investment of the project is RMB 1.176 billion Yuan. Cooperation form: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be RMB 4 billion Yuan, profit RMB 450 million Yuan. Of which, when the intelligent sorting line is completed, the estimated annual growth value of sales income will be one billion Yuan, total profit will reach RMB 80 million Yuan. The investment is estimated to be recovered within 5-6 years; after the cold chain logistics system is completed, the growth value of annual sales income will be RMB 2.8 billion Yuan, annual total profit will reach 300 million Yuan. The investment will be recovered within 7-9 years; after the apple exchange center is completed, it is estimated that the growth value of annual sales income will be RMB 200 million Yuan, annual total profit will reach RMB 70 million Yuan. It is estimated that the investment will be recovered within 5-6 years.
